Hot and Cold Therapy, Our Specialty!

We are committed to providing the best to your satisfaction!

Our pride in delivering tailored turnkey solutions to meet your specific requirements efficiently and affordably

inquiry@novetecgroup.com info@novetecmed.com www.novetecgroup.com www.novetecmed.com

Found in 2007, Sino-American Novetec Group is a specialist manufacturing, procurement, and distribution company for healthcare products, sporting items with extensive experiences in manufacturing and managing projects to fulfill customers' satisfaction.

Over these years of operations, Novetec Group has been growing from strength to strength over time. We continue to commit in serving with quality products and services through our dedicated team. The Group has been vertically integrating in development and collaborate with entire supply chain network to drive meaningful cost savings in every aspect. By promoting a strong team morale, it accelerates the optimal synergies among various disciplines of the group. Going forward, we will continue to strive every improvement in all aspects of manufacturing and service.

We pride ourselves in delivering "best in class" to our business partners and customers on healthcare products.

Novetec has been manufacturing and distributing occupational therapy products being used throughout the world today. We are here to help you in any way we can! Currently, majority of export are to the USA and Europe, we are working hard on other markets including Canada, S. America, Australia, Middle East and Asia to cope with continued demand. As a vertically integrated and lean manufacturing Group, we continue to strengthen entire plant management through advanced manufacturing operations, machine automation and quality management as well.

Our Vision:

By providing superior services, embraces the advanced manufacturing technology and strategic alliances to help people be healthy, enjoy life, offer an affordable solution to healthcare.

Our Mission:

To exceed our customers expectations in quality, delivery, and cost through continuous improvement and customer interaction.

We maintain a superior level of integrity in interactions with business partners and associates. We will do our best to make that successful completion happen.

Our plant was found in 2009, located in Lilou Industrial Park of Shangqiu in Henan Province with area of 4,000 sq. meters. Shangqiu is a city in eastern Henan province, Central China. It borders the provinces of Shandong and Anhui to the northeast and southeast respectively. Shangqiu has grown significantly in recent years. It is located at an important location at the junction of several major railways, making it a major regional transportation hub.

Our plant is committed in establishing as a high level expertized plant focusing on manufacturing of top quality hot and cold therapy products.

Quality is not limited to just products that we manage and deliver, but integrates into every task that is performed by each teammate of the Group.

Our primary focus is on helping you build your business, by consulting and working along with you to determine the best way to meet with your needs. We are committed to providing every service to your satisfaction.

We are vertically integrated, lean manufacturing, continue to strengthen entire plant management through advanced manufacturing operations, machine automation, and team quality management.

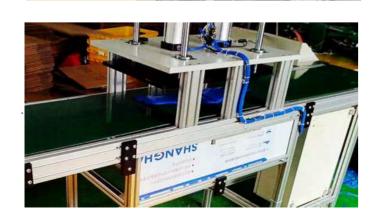

We are led by proficient specialist plus constructive advice obtained from medical doctors. Our R&D team continues to catch up in pace on new product development.

Our Offer

We are committed to offering you the excellence in innovative design and quality product at a most reasonable cost to maintain competitiveness.

Product Quality:

We should not forget that customers, after all, serve as the ultimate judge of quality in the marketplace.

We understand quality should be primarily customer-driven. Keep close contact with customers to listen, understand and to fulfill their requirements for a win-win. Continue to implement quality-improvement programs as a constructive way of upgrading product quality.
